> More about NET SURFING

Netsurf is a company founded in 1995 in Ivrea, Northern Italy, by a group of professionals coming from Olivetti's Research and Development department.

Netsurf is the reference IT partner for the companies working on Asset Management And Facility Management in Italy, ensuring complete functional coverage, including mobile business processes in different sectors. Its speciality is building modular and integrated systems, multi-level (Group/Country/Company) and multi-product, which comply with all the business requirements in complex and highly regulated market sectors, for international enterprises and groups who want a common platform that can handle the peculiarities of different countries.

Netsurf is a partner of a leader company for Enterprise Asset Management solutions and extends EAM features by developing several components. All products are developed to support corporate sustainability.

Netsurf has a multidisciplinary team of specialists in innovation, interaction design and software engineering. This ensures qualified, motivated staff and a constant interest in research. Targets are reached by staying on top of new business models and web development.
