

CONSULTING AUTOMOTIVE AEROSPACE RAILWAY

> More about CONSULTING AUTOMOTIVE AEROSPACE RAILWAY

AAR is a service company aimed at delivering a large range of high-quality engineering activities on the international market.

The perfect balance between customer satisfaction, the people growth and the remuneration of the investors, is probably the main success factor of the company.

Our reference market is the engineering services for the industrial sector with a particular focus on the automotive industry. The addressed market is also the manufacturing industry, focusing on the mechanical and electronic marketplace.

The CAAR services include all activities from product design to industrialization, from production engineering to design of production tools, assistance, and start-up of complete assembly plants and vehicles.

The high professionalism of our consultants is the main leverage of our growth.

The accurate financial management of the company is the biggest safety for our investors.

CAAR mainly operates in the automotive and smart manufacturing fields.
