

Eurofork

> More about Eurofork

Eurofork was created to become a world leader in the production of automatic handling systems for automated warehouses.

Today the company, with over 120.000 applications sold in more than 93 countries, is a reference point for the world's leading system integrators and one of the top manufacturers of cutting-edge handling devices and pallet shuttle systems.

Eurofork telescopic forks are recognized worldwide as a guarantee of quality and reliability due to our Made in Italy policy and the decision to equip all products with components from the best European brands.

The company's continuous investment in research and development allows Eurofork to offer Industry 4.0 solutions such as ESMARTSHUTTLE, the innovative shuttle system ideal for multi-depth automated warehouses that require flexible, modular solutions suited to high throughputs and performances.

Eurofork

The entire Group strives to evolve continually, promoting technological transfer to new sectors and opportunities; in this context, Eurofork has joined the world of e-mobility with its battery swap solution. This includes a fully automated system where Eurofork shuttles and forks replace the batteries of electric cars in just twenty seconds.

Awarded as one of the best Italian mechatronic companies, Best Managed Company from Deloitte, and as 'Business of the year at the European Business Awards, Eurofork aims to become an international innovation hub, putting people at the centre of the project and constantly investing in new businesses, with a particular focus on sustainability.
