## > More about PhiDrive

Phi Drive is a start-up founded in 2013. Phi Drive owns a high number of patents and highly innovative products, including rotary piezoelectric drives. The technical skills and creativity of Phi Drive were awarded in 2013 the "Premio Nazionale per l'Innovazione" and the "Premio dei Premi".

Winners of the European funding project Horizon 2020 for their satellite actuators design, the engineers from Phi Drive are proud of their knowledge which extends to the space sector, where the extreme conditions provide endless ideas for the development of innovation in industry.
