## > More about TORNERIA FANTI R.

FANTI company was founded in 1938 by Fulvio Fanti and then it passed into the expert hands of his son Renato. With hard work his company became known in national and international trade market and he was able to reach his aim in supplying the biggest mechanical companies of the world. Since the 7<sup>th</sup> November 2005 the company has been in Collegno (TO) in a new and modern industrial building.

With the help of his sons Fulvio and Claudia, the company "Fanti Fulvio di Fanti Renato" was totally incorporated in "Torneria Fanti R. s.a.s." and after in "TORNERIA FANTI R. s.r.l."

Paying attention to technological developments and to trade market requests, TORNERIA FANTI'S aim is customer satisfaction ensuring high quality of products, competitive prices, respect of delivery terms, clear and quick customer interaction.

The Management System is certified according to the rules UNI EN ISO 9001:2015 – IATF 16949:2016.

We took also the environmental certification ISO 14001:2015.

We have a metrological room where we calibrate, with instruments certified by LAT centres, the instruments used in production area for dimensional inspections.

According to the customer's specifications, we carry out mechanical machining such as Turning, Milling, Drilling, Boring, Tapping and Threading.

We produce small precision metal parts starting from the following raw material: Steel and its alloys, Aluminium, Plastic and Brass.

TORNERIA FANTI mainly operates in the automotive and smart manufacturing fields.
