

CEMAS ELETTRA

> More about CEMAS ELETTRA

Cemas Elettra is one of the largest European companies experienced in designing and manufacturing equipment to weld thermoplastic materials.

To satisfy even the most complex requirements of the customer, Cemas Elettra's equipment can offer different processes:

- Laser welding Technology
- Vibration welding Technology
- Ultrasonic welding Technology
- Infrared welding Technology
- InfraStake welding Technology
- Plastic Gluing

The Cemas group includes six product plants, six commercial offices, one official distributor.

Cemas Elettra mainly works in the automotive and smart manufacturing fields.
