> More about novasis innovazione

Novasis Innovazione is a young Italian company with comprehensive skills and experience developing machine vision and contactless measurement systems and infrared gas sensors.

The solutions and products proposed are based on high technology innovative content, and combine physical-engineering expertise on optics, sensors, and vision. The company, in only a few years, has become acknowledged on the market thanks to robust and reliable systems and products.

Novasis Innovazione believes in the excellence of Made in Italy. For this reason, gas sensors and machines are produced at their own laboratories; in the same way, vision systems are integrated inhouse by highly specialized technical personnel.

Novasis Innovazione believes in the ability of research projects to generate new growth opportunities for both enterprise and business. Thanks to a team of long-time professionals in the field, with complementary skills and a common passion for analyzing and designing new, distinctive and innovative solutions, Novasis Innovazione is actively involved in collaborative research projects.

Novasis Innovazione mainly operates in the cleantech, smart manufacturing, and health & wellness fields.
