ProTek

> More about ProTek

ProTek designs, manufactures, and installs industrial automation systems (mainly prototypes), such as machines and benches for automated assembly, checking, and testing of objects composed of one or more elements (post-process). We provide bespoke state-of-the-art solutions to manufacturing industries such as automotive, pharmaceutical, cosmetics, food and tissue.

Our portfolio also includes a wide range of conveyor and handling systems: efficient, reliable, and flexible solutions designed to fit also into the most demanding applications. They are composed by a set of standard elements that belong to our ProFlex product line.

We develop and produce:

- Single/Multi operation benches
- Manual benches
- Automatic/Semi-automatic benches
- Assembly and testing lines with Cartesian axes and/or rotary tables
- Robotized assembly and testing lines
- Gravity and/or mechanical feeders
- Pick & Place handling and feeding systems.

Every solution is designed and built to faithfully meet the technical and production needs of the customer and is compliant with the standards envisaged by Industry 4.0.
