

Dual Sanitaly Società Benefit

> More about Dual Sanitaly Società Benefit

From 1949 DUAL SANITALY works in Italy in the field of orthopaedics and the healthcare and wellness sector.

eKeep is the innovative line of orthotics designed by DUAL SANITALY. The name itself – eKeep® is the most distinctive sign of its creation. A brand founded on the close collaboration of a team of specialists – équipe – with a mission to protect and preserve – to keep – a key part of the body: the joints. eKeep boasts an all-Italian production cycle: design, materials, production and packaging are 100% Made in Italy.

Each product is produced with a fine attention to detail and monitored throughout all stages to afford an outcome that meets the highest quality standards. All these features designate the eKeep brand as the perfect synthesis of the orthopaedic competence and quality of textile and industrial production in our country.

All eKeep products are manufactured in compliance with UNI EN ISO 9001 quality assurance standards.

The first patented item in the eKeep line, thus attesting to the degree of orthopaedic innovation is S2 Shoulder Stabilizer: the first brace for the prevention of shoulder dislocation to be worn like a sweater. The second patented item is K1 POSTURE KEEPER that acts on the dorsal dynamic and is recommended for posture correction and stabilization.

DUAL SANITALY mainly operates in the health & wellness and textile fields.
