Farmen International Cosmetics Distribution

> More about Farmen International Cosmetics Distribution

From its establishment, FARMEN ICD spa has always pursued a single objective: offering beauty and style professionals effective, reliable and innovative products to meet all their working needs.

The result of this commitment is reflected today in our three production lines: Vitality's, NEA-SPA and Fascinelle.

VITALITY'S is the line dedicated to hair stylists. A complete, high-quality range, designed to enhance clients' style and improve their well-being. Specific colouring, shaping and styling solutions that offer added value: the creativity and experience of Italian-made products.

NEA-SPA is the brand dedicated to the professional beauty sector. A complete range of treatments for the face and body, with natural and exclusive active ingredients derived from FARMEN'S research.

FASCINELLE is the brand created to satisfy the needs of clients who purchase through the selective perfumery channel. A complete product line with high-end products for the well-being and style of hair.
