

TECNOLAB DEL LAGO MAGGIORE

> More about TECNOLAB DEL LAGO MAGGIORE

Tecnolab del Lago Maggiore Srl is a test, measurement and research institute located in Verbania.

Tecnolab is a laboratory accredited by ACCREDIA (LAB N° 0991L) which ensures impartiality and technical expertise for the benefit of our customers and partners.

Tecnolab performs tests, measurements, studies and research in main technological fields:

- **Electromagnetic Compatibility and Electrical Safety** (EMC Electromagnetic compatibility tests, Environmental testing, Electric safety testing and verification IP)
- **Mechanical** (Mechanical tests, testing of valves and sanitary tapware)
- **Materials** (Tests on metal alloys, Tests on non-metallic materials, Tests on elastomers, Failure analysis, Resistance to dezincification, Scc, analysis of corrosion resistance, Salt spray corrosion resistance Tests, Tools in a contact with food and Climatic Tests and thermal shocks)

TECNOLAB DEL LAGO MAGGIORE

- **Automotive** (EMC test in the automotive sector)
- **Engineering** (vibration testing with electro-dynamic shakers and non-standard mechanical tests)

Since 1995, Tecnolab is the ideal trading partner for companies that wish to test components and products requiring specific testing, necessary to check the compliance with regulatory requirements, as well as customized tests according to specific needs. **Transversal competences and a wide range of equipment and devices offered by Tecnolab allow to meet most of the customers' needs through an advanced transdisciplinary approach.**

Our corporate organization allows to have a client approach, since addressing us customers may have just a single interlocutor for different types of testing. Taking charge of the request we support our customers during all main steps until the final results.

We are able to perform tests and measurements for large and small projects with the same high standards of service.

Tecnolab is the right technological partner to develop projects and feasibility studies, seeking and examining calls and funding promoted by public bodies and also private companies.

We invest a lot on continuous training of personnel and to maintain the laboratory state-of-the-art equipment and to improve the quality level of testing and measurement every day. Certifications, acknowledgments, accreditations and qualifications are the most important technological achievements for our company. Through these processes Tecnolab has consolidated its activities and strengthened its position as reference point for Italian and European companies intending to test their products.

TECNOLAB DEL LAGO MAGGIORE

1. **Expertise:** Tecnolab provides its customers and partners all its technical expertise, its certified experience gained over the years with public and private institutions.
2. **Impartiality:** Tecnolab is a certification body accredited by the Italian accreditation body ACCREDIA which ensures expertise, impartiality and independence of the certification bodies.
3. **Updating:** to maintain the high standards of service and quality levels of our measurements we rely on continuing professional training and updating of our personnel and of test procedures.
4. **Multidisciplinary:** we carry out our tests in 4 main fields: electromagnetic compatibility and electrical safety, mechanical, materials and automotive. This allows Tecnolab to be a transversal body capable of performing measurements in different fields.
