

GUERRA S.A.S. DI GUERRA GIANPIETRO E C.

GUERRA S.A.S. DI GUERRA GIANPIETRO E C.

> More about GUERRA S.A.S. DI GUERRA GIANPIETRO E C.

Established in Italy in 1983 as a leader company in the artisan production of bulbs for hospital medical application. The attention and the care given to the details, based on the founder's pluriannual experience, brought about a good achievement for the product quality on the Italian market, either standard or other made on drawings or on burnt samples. In short time the "Guerra" lamps became well known. They were successfully set on the European market through exhibitions. Our customers can buy first-rate lamps in accordance with non binding quantities.

The company on familiar management became a firm by availing itself of some collaborators, this to satisfy the market requests.

The company Guerra Gianpietro made itself known in Europe, in the Middle East, in Asia and in the South America by means of the exportations. With the entrance of the East European countries in the European community our attention is given to those domestic field operators who could count on our experience in order to have services very difficult to get till now, because of their economical and political situation.

COMPANY PROFILE:

GUERRA S.A.S. DI GUERRA GIANPIETRO E C.

Our company is a leader firm in the artisan production of bulbs for optical instruments such as microscopes, endoscopes, ophthalmoscopes, operating theatre lights and for all kind of equipments with light sources. our technology, improved over the years, is now synonym of good quality spread out the products that go to enlarge our product range of incandescent and halogen lamps which are already well known and appreciated on the italian and foreign markets. all the details are carefully studied in order to get the optimal item to meet the final users' requirements. our staff is at your disposal to give you every further information you may need. the artisan care and the attention given to the details assure a very good quality to our bulbs and enable us to produce, in addition to our standard items, mentioned in our technical catalogue, even special lamps made on technical features supplied by the customer, in case the quantities requested justify such a production. this and other peculiarities make our production unique.
