OFFICINA COSMETICA ANTICHI RICORDI

> More about OFFICINA COSMETICA ANTICHI RICORDI

Passion, curiosity and respect for the planet are the values on which OFFICINA COSMETICA ANTICHI RICORDI is based to propose a natural and dermatologically tested soap.

We produce soap as our grandparents did, with recipes with low environmental impact, trying to limit as much as possible the emissions into the atmosphere and the use of water; we use only natural product and let's season the soap slowly and naturally.

The things of the past were made with love, in a natural way and without artifice, and that is how we want to propose again on the market: a natural soap made with very few ingredients, without preservatives and parabens, 100% free from animal tests and with an essential and recyclable packaging.

Our goal is to take care of your skin in a natural way without damaging the environment around us. We don't use palm oil for an ethical choice; we believe in the importance of protecting the planet so we say no to deforestation.

We offer natural soaps with different properties and fragrances suitable for all types of sensitive, delicate and dry skin.

ANTICHI RICORDI natural soaps can also be used by those suffering from atopic dermatitis and psoriasis thanks to the soothing properties of olive oil.
