

ABC FARMACEUTICI SPA

ABC FARMACEUTICI SPA

> More about ABC FARMACEUTICI SPA

ABC is an Italian pharmaceutical group established in 1925, committed to research, development, manufacturing and commercialization of pharmaceutical products and active ingredients.

The Company achieved many international patents in gastroenterological and pneumological fields thanks to efforts expended in over 80 years of research.

As far as concern the industrial development, ABC Farmaceutici is present with up-to-date production equipment for the manufacturing of pharmaceutical products and active ingredients.

In fact, the Company follows the whole supply chain of the drug, from the active ingredient to the manufacturing of the finished product, till their promotion and sale.

The manufacturing plants are sited in the northern Italy: the San Bernardo d'Ivrea (Torino) plant, a modern example of high technology in the pharmaceutical manufacturing field, and the Trecate (Novara) plant for the production of the active ingredient. These constitute for ABC group an industrial reliable support for the development of new molecules.

ABC Farmaceutici for the generic drugs too, lavished huge investments in order to bear the Italian competitiveness in the pharmaceutical worldwide market.

Ethicalness, competence and experience allowed ABC Farmaceutici to become the partner of the main pharmaceutical multinational Company also in the contract manufacturing activity both in active ingredient and in finished products manufacturing.
