

TOMPOMA SRL

> More about TOMPOMA SRL

Today, in 2021, Tompoma is trying to make a turning point in its internal growth and diffusion in the world.

By continuing to invest in Research and Development, increasingly technological and cutting-edge products are being obtained, in order to offer our growing clientele models for every type of need and application, trying to reduce costs to ensure a "democratic" product that can reach every possible user.

In the production process there is still a strong incidence of skilled Italian craftsmanship to ensure the enhancement of style, Made in Italy and excellent quality.

The Tompoma company has chosen to work alongside excellent partners for the development of the industrial project.

Among the various realities, the union established with the Provagliese cooperative that deals with the logistics, assembly and expedition of Tompoma products stands out. "Solidarity Provagliese" is a non-profit social cooperative founded in 1985 thanks to the initiative of Don Danilo Vezzoli and a group of volunteers, moved by the desire to find answers to the employment needs of some disadvantaged children in the area. The job placements are aimed above all at people with physical disabilities, with mental or psychological distress and at long-term or old age unemployed.
