

SANITAG S.R.L.

> More about SANITAG S.R.L.

In the event of an emergency, it is currently not possible to report one's health situation, both present and past. The necessary documents, radiographs, electrocardiograms, ultrasounds, CT scans, prescriptions, etc., lie, in the best of cases, in the drawers of our homes.

SANITAG® stores them for us and in any situation, place or language, allowing healthcare professionals to view them with extreme simplicity, thanks to the user who autonomously, through a smartphone or computer, will have entered them with a simple click.
