

TORET Devices

> More about TORET Devices

TORET IS A BRIDGE BETWEEN INNOVATIVE IDEAS AND THEIR SHAPE AS FINAL PRODUCTS

Founded in June 2019 and arising from a ten-year experience in research and development projects, TORET offers high-qualified consultancy in technology transfer, design and software development and product compliance. Our research and design activities are applied in the fields of radiation physics, biotechnology, radiodiagnostics and nuclear medicine, and in the agri-food, steel and manufacturing industries. And much more. TORET is aimed at any university, public or private institute that wishes to enhance a research project, and at small and medium-sized enterprises that intend to intensify or diversify investments in research and development.

WHY TORET

TORET devices is a harmonious and coherent interpretation of your idea. It is innovation and versatility, technique and curiosity. Our value proposition is to respond to the new demands of scientific research and smart factory, with the approach of an innovative small company, which proposes the most robust design solutions and the most reliable control measures, mixing cutting edge technologies, artificial intelligence and internet of things. By collaborating with TORET, partners and customers have the opportunity to interact with a flexible, pragmatic and creative reality.
