Skyproxima

> More about Skyproxima

Skyproxima is shaping the future of Advanced Air Mobility.

We design and implement integrated air logistics systems for healthcare, emergency response, infrastructure monitoring and security. Our proprietary platforms combine AI, drone technology and certified medical transport solutions to deliver fast, safe, and sustainable services. With strong partnerships across Europe and a mission-driven approach, Skyproxima goes beyond product development: we create real-world impact. From refrigerated smart containers to aerial corridors approved by institutions, we turn vision into operational excellence.

Skyproxima is where innovation meets responsibility — bringing life-saving technology into the skies of tomorrow.
