> More about CAVAGLIA' PLASTHING

Cavaglià Plasting was born in 1977 in a small laboratory in Costigliole Saluzzo. Twelve years later the company moved to a larger facility in Piasco. In over 40 years of activity, the Company has developed and built and supplied molds, equipment, special machines, assembly systems and prototypes throughout the Italian and foreign industry in the automotive, food, medical, cosmetics, white and packaging fields.

Over the years the company has specialized in the design and construction of molds and plastic injection. Innovation, efficiency, assistance and quality are the strong points on which Cavaglià Plasting is based. Specialized personnel are experts and machinery and high precision are examples of reliability.
