> More about Robota

Robota SRL is a pioneering company in automation technology, known for producing the world's first fully automated machine dedicated to the sterilization of surgical instruments. This state-of-the-art machine revolutionizes the reprocessing of surgical tools by integrating advanced robotic components with precision sterilization techniques. It operates with minimal human intervention, significantly enhancing speed, efficiency, and safety. Through innovative design, Robota SRL ensures consistent compliance with stringent hygiene standards, reducing contamination risks. Robota Srl is committed to developing cutting-edge robotic solutions, ensuring the highest level of quality at every stage of the process, from design to production and post-sales support. We are dedicated to continually exceeding industry standards in the sterilization of surgical instruments, delivering products that not only meet but surpass the expectations of our clients, healthcare professionals, and patients.

We address the need to innovate outdated sterilization processes that present biological risks, long cycle times, and potential human errors by creating technologies that improve people's lives and optimize sterilization services through a constant focus on quality, safety, sustainability, and standardization.
