

LA FINESTRA SUL CIELO

> More about LA FINESTRA SUL CIELO

Our passion started in 1978, in Torino - Italy, spreading natural health information by organizing cultural activities. With that experience and with the direct contact with the public, LA FINESTRA SUL CIELO started with the distribution of high quality organic products, providing consumers with food products that are suitable for a proper natural diet.

For over 40 years LA FINESTRA SUL CIELO has been among the market leaders in offering organic products that create added value in the field of wellbeing, for both man and the environment. Careful selection of raw materials and control of the production chain, from growers to sales outlets and the strict selection of sales channels, all meet with the approval of customers for our high quality products.

Since 2003 LA FINESTRA SUL CIELO has created a series of new activities, in order to respond to new market challenges. We combined all our knowledge and created synergy by starting the Idea Team Group, an international holding in constant expansion in the food sector, both on the European market and outside Europe.

LA FINESTRA SUL CIELO

LA FINESTRA SUL CIELO mainly operates in the agrifood and health & wellness fields.

We have two companies inside our group, specialized in production and packaging to increase our offer and product quality:

SGLUT®

Sglut® is a new dynamic, and flexible brand specialized in the production of sweet and savoury snacks, breakfast cereals: all gluten free and dairy free. It is the answer to the needs of consumers who are increasingly attentive to how healthy their diets are, but who do not want to give up the flavour of tasty food. In addition to the Sglut® products, the company has gained experience in the private label sector. A know-how that makes Sglut® an advanced contractor in the market, a reliable partner in every step of the product creation, from formulation to packaging. Each step is designed according to customer needs. A company that offers competence, response speed, dynamism, and flexibility.

NATURÀ

The company was founded in 2001 from an ample modern industrial and commercial structure with an area of 2,250 m². Company activities are concentrated on: packaging and distribution of organic food products through the conventional channel and big organized distribution.

Naturà Srl specialises in the production and packaging of liquid, semi-liquid and paste food products in glass bottles and jars and in the packaging of beans, cereals and breakfast cereals in a protective atmosphere. The new automatic, electronically controlled systems allow efficient production with very high standards of quality. The company manufactures and packages products for its own needs or under third party brand names.
