PROGE FARM

> More about PROGE FARM

COMPANY PROFILE

Founded in 1992 in Novara (Italy), PROGE FARM is a pharmaceutical company, which develops, registers, manufactures and commercializes drugs, medical devices and food supplements containing property probiotics.

It is a fully integrated company (R&D, production and sales) and fulfils the complete chain from isolation to ready-to-market product (with efficacy clinically demonstrated).

In its GMP manufacturing plant PROGE produces probiotics following innovative processes to improve their quality.

WHAT WE OFFER

PROGE FARM has developed, registered and owns medicines, medical devices and food supplements containing proprietary probiotic lactobacilli strains.

Several products are already marketed in Italy and in some European countries.

Among these there is also a topical drug for vaginal infections and a product for dermatological use.

The therapeutic areas are GI, women's health, pediatrics and dermatology.

Since PROGE FARM has a GMP approved manufacturing plant, it can also supply probiotic strains as raw material even of pharmaceutical type.

WHAT WE ARE LOOKING FOR

PROGE FARM

PROGE FARM

PROGE FARM is interested to out-license and to supply own original probiotic products to be promoted and marketed in Italy and outside Italy.

PROGE FARM is looking for pharmaceutical companies with a sales force already present in the following therapeutic areas: GI, women's health, paediatrics and dermatology.

PROGE FARM offers its portfolio of probiotic products on a B2B licensing basis to pharmaceutical Companies worldwide.

Moreover PROGE FARM can supply probiotic strains as raw material for food supplements and also pharma grade.

Territories of interest are Europe (EC and CIS), USA, Canada, South-America, North Africa, Middle East and Asia.
