## > More about ABICH

ABICH S.r.l. is a SME, providing research and analysis for the industry, mainly manufacturers of cosmetics, medical devices and other consumer products. ABICH offers a wide range of services in the field of biological and chemical analysis to be applied in cosmetics, biomedical, industrial hygiene, and other sectors. Research activities are focused on the development of new biotechnology-based methods to assess the safety and effectiveness of industrial and consumer goods such as chemicals, raw materials, botanicals, cosmetics, medical devices, detergents and textiles.

ABICH has developed and implemented many alternative in vitro assays to test the biological properties and safety of products and ingredients for human use.

ABICH laboratories offer biological, chemical and clinical testin and R&D projects in different industry sectors such as cosmetics, drugs, medical devices, innovative textiles.

# ABICH

ABICH has developed and implemented a wide panel of alternative in vitro assays based on cell cultures and reconstituted tissues to test the safety and biological properties of ingredients and products for human employ (Toxicity assays, percutaneous absorption, efficacy assays). ABICH received a special innovation prize from the Italian Chamber of Commerce in 2004.

Strong partnership with the Molecular and Cellular Immunology Laboratory of the San Raffaele Hospital in Milan gave also birth to a spin-off service testing company (ALLTOX), setting up innovative testing methods and research projects concerning allergies related to consumer products. A partnership with a clinical CRO (Latis srl in Italy) allows to design and conduct clinical trials for drugs and medical devices.

ABICH laboratories are equipped with a state-of-the-art cell culture facility, a fully equipped analytical chemistry division, a microbiological laboratory, two clinical and cosmetic testing facilities and a laboratory dedicated to product formulation & development.

ABICH owns a ISO 9001 quality system certified by TUV and operates according to GLP standard certified (Italian Health Ministry). Montreal site is FDA approved for Sunscreen testing (SPF). All the facilities are undergoing the GMP certification process in 2017 for chemical and microbiological quality control of drugs.

ABICH mainly operates in the health & wellness, textile and agrifood fields.
