Weaving yarn

> More about FILATURA DI POLLONE

FILATURA POLLONE was born in 1953 as woolen system spinning mill producing yarns in cotton blends.

In 1972 our production was increased with the introduction of the new Open End Spinning. System and using new artificial, synthetic fibers.

In 1994 we developed a new traditional woolen system called "Carded Ultrafine" (mark registered and owned by Filatura di Pollone) for the production of wool and fine fibers yarns, and still today this trademark represents us on the market.

FILATURA DI POLLONE production is diversified in woolen, open-end and carded ultrafine yarns. The big yarn range, the high service offered to customer, the adaptability and flexibility of commercial and production organisation combined to big capacity to 'customize' product give to our company the possibility to satisfy a big number of customers in every specific demand.
