> More about Manifattura di Domodossola

Since 1913, Manifattura di Domodossola has been an undisputed leader in the production of braided items for leather goods, apparel, furniture, jewellery and footwear. The company hosts the entire production chain: by managing all processing operations we can proudly state that our products not only are "Made in Italy", but also "Made in Manifattura di Domodossola".

A wing of the plant hosts the braiding machinery and the large looms where Manifattura Domodossola's famous braids are made, whereas another wing houses the leather processing and yarn waxing department.

Always looking to the future, while still anchored to the values and traditions of its local territory, at the beginning of its second century of activity, the company inaugurated two business unit: OXILLA, the division exclusively dedicated to the luxury furniture sector and ATHISON, specialized in manufacturing high quality leather goods, bags, belts and bracelets.
