F.LLI GRAZIANO FU SEVERINO

> More about F.LLI GRAZIANO FU SEVERINO

The history of the F.lli GRAZIANO company began in 1841 with the clever idea of making a typical family tradition, spinning and weaving, into a proper business. The F.lli GRAZIANO company started out with four hand looms and has since grown with great passion, using the latest technology and following the needs of the market at all times.

The historical strength and actual value of the F.lli GRAZIANO company can be attributed to its state-of-the-art equipment and technology, its guarantee for high quality products, painstaking research into aesthetics and processes, an attention to detail, an eye for future commercial trends and an impeccable service tailored to the needs of customers.

F.lli GRAZIANO'S products can now be found all around the world bearing its own brand and those of international firms who trust in the skill, creativity and guaranteed quality of this historic company.

State-of-the-art technology and painstaking detail, rigorous checks and an attention to detail during all work processes ensure production of the highest standard of quality and the certainty of obtaining the best results on the market.

MADE IN ITALY

Forty-six new-generation electronic looms enabling to create fabrics from 300 to 1.200 T.C. guarantee the absolute quality of the weaving process at a height of up to 330 cm, using flax, cotton and wool.

The company is specialized in jacquard weaving and the fabrics are made with great care, to be sold by the meter or in ready made bed and table linen products.

Preparation and finishing are performed in-house to meet all needs in terms of creativity and size, for F.lli GRAZIANO'S own brand of products and for the customization of products for private labels.

A global leader in the even woven fabrics of pure flax, pure wool and flax-cotton blends, F.lli GRAZIANO is one of only five producers in the world of technical fabrics (satin wrappers) for the decatizing stabilization of woollen fabrics during the finishing process thanks to an entire set of state-of-the-art air looms.
