## > More about LANIFICIO TG DI FABIO

LANIFICIO TG DI FABIO was founded in 1995 by the experience and know-how achieved in the previous 40 years by Fabio Tallia Galoppo and his father Floriano in the production of menswear worsted fabrics. Nowadays the third generation supported by a skilled team is carrying on the activity in the same direction to guarantee a high standard of quality and service.

LANIFICIO TG DI FABIO has consolidated an important position in Italy and in international markets, selling over 2,000,000 meters of fabric per year.

LANIFICIO TG DI FABIO is a leading company in search of fabrics with innovative designs range from fashionable product, jacquard and non-jacquard (wool blends with cashmere, cotton, mohair, linen and silk according to the seasons), to a more classic and traditional product in pure wool of different fineness, typical of the Biella area. Each new product is developed and engineered thinking about a specific market or an individual brand, combining style with experience.

TG DI FABIO fundamental strategy is to maintain a lean and solid structure, to focus on people who made the company success with sacrifice and dedication, to continue investing in young people, to maintain the markets interest for a product by renewing collections and finally, by diversifying.
