> More about Bottonificio Piemontese

Bottonificio Piemontese since 1955 is located near Turin. Founded by grandfather, today the third generation of the Giudici family is present in the global market. The quality of the buttons, the refinement of the lines and finishes and the originality of the collections make the Bottonificio Piemontese the official supplier of the major international stylists.

The new autumn winter collection includes high level buttons supplied by models from classic lines, clothing accessories, natural buttons and eco-sustainable and recycled materials. Our inspiration takes it from experience using multistrated materials, combinations with rhinestones and stones utilizing new materials and new production processes, looking for new effects, new colors and original finishes.
